

SPRING BIRD WALK

Sunday, May 3, 2026

7:00 to 9:30 AM (rain date May 4)

May marks the peak of spring migration, presenting bursts of color and song as birds return to New Hampshire's woods, meadows and wetlands to set up nests or rest before continuing further north to Canada. **Lena Moser's** beginner-focused bird walk is a relaxing way to enjoy the unique habitat of Quincy Bog while learning first-hand from an experienced birder and naturalist. Meet at 7:00 AM at the Nature Center.

Participants are encouraged to wear sturdy footwear and bring drinking water and binoculars. In case of rain or thunderstorms on Sunday, the walk will be rescheduled to Monday, May 4. Please see Quincy Bog Facebook page or www.quincybog.org website for information.
